JANUARY 2026

**TEXO: A LEADING UK  
HUB FOR FABRICATION,  
MOBILISATIONS AND  
OFFSHORE SUPPORT**

# TEXO: A LEADING UK HUB FOR FABRICATION, MOBILISATIONS AND OFFSHORE SUPPORT

TEXO's facilities at the Blyth Offshore Support Base position the company at the heart of one of the UK's most capable and strategically located offshore hubs. With direct access to deep-water quaysides, extensive fabrication capacity and proven delivery across oil & gas and renewable energy sectors, TEXO offers a truly **end-to-end solution** for offshore projects.

From fabrication and maintenance through to heavy lifting, testing, storage and vessel mobilisation, TEXO supports the full lifecycle of offshore, subsea and onshore equipment — all from a single, integrated location.

## End-to-End Maintenance, Repair and Support

TEXO provides comprehensive inspection, repair and maintenance services, including preventative maintenance programmes, winterisation, equipment overhaul and long-term preservation solutions. These capabilities are complemented by specialist offshore accommodation, HVAC and refrigeration services, alongside modification and improvement works designed to extend asset life.

Clients also benefit from a range of on-site support facilities at Blyth, including offices and meeting rooms, plant and equipment hire, scaffolding and access solutions, secure storage, rope access, and survey and inspection services — all supported by TEXO Recruitment.

## Advanced Fabrication and Quayside Infrastructure

At the core of the Blyth facility is a **2,200m<sup>2</sup> fully equipped fabrication workshop**, featuring dual 20-tonne overhead cranes, oversized access doors and dedicated quayside handling. This is supported by multiple commercial quays across South Harbour, SUF Terminal, Bates Terminal and Battleship Wharf, making the site ideal for subsea spreads, cable handling and offshore construction projects.

TEXO's mobilisation and demobilisation hub is fully equipped to support vessels of all sizes, with seamless movement of equipment between fabrication, storage, maintenance and quayside zones.

## Heavy and Complex Lifting Expertise

TEXO delivers trusted heavy and complex lifting operations, with on-site cranes ranging from **124 to 600 tonnes**, certified rigging stores, forklift hire up to 32 tonnes and heavy-lift transport. Projects are underpinned by detailed lift planning, RAMS and engineering assurance, with additional support for wet testing, commissioning and complex jacking or tilt operations — all delivered with full compliance.

## Turnkey Quayside and Vessel Support

The Blyth base offers 24/7 access to deep-water quays and heavy-strengthened load-out areas capable of roll-on/roll-off operations up to **3,000 tonnes**. TEXO provides full turnkey quayside support, including project planning, fabrication of grillages and sea-fastenings, transportation, testing and certification.

On-board vessel services include welding, fabrication, static and dynamic load testing, with class-approved services available where required — creating a streamlined solution for offshore construction, subsea, cable and energy markets.

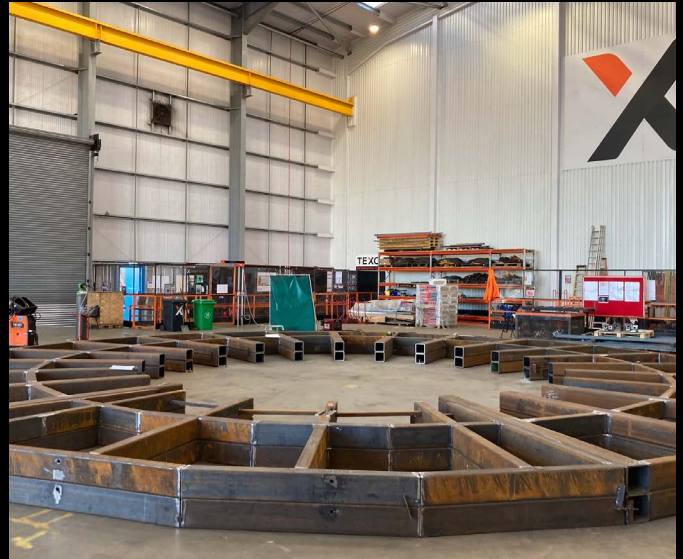

## Certified Fabrication Capability

TEXO's fabrication services are backed by **Lloyd's Register-approved weld procedures**, covering a wide range of materials including carbon steel, high-strength steels, duplex, stainless steel and specialist alloys. Fabrication capabilities span offshore and subsea structures such as grillages, storage reels and baskets, carousels, subsea vehicles, A-frames, handling systems and protection structures, as well as onshore industrial steelwork, pipework and access systems.

All TEXO fabrication sites operate under **5S lean disciplines**, ensuring consistent quality, efficiency and safety.

## The Blyth Advantage

With four terminals, over 55 hectares of land, extensive construction yard space and access to heavy transport and lifting equipment — including SPMTs and mobile cranes — the Port of Blyth provides a genuine one-stop offshore supply chain. Located on the UK's east coast, it offers excellent access to North Sea offshore wind, energy and marine projects, making it an ideal base for fabrication, mobilisation and load-out operations.

**Fabrication with direct quayside access** allows TEXO to eliminate unnecessary transport and handling, reducing cost, risk and project timelines — delivering tangible value to clients.

## Start your next offshore project with confidence

Whether you require fabrication, heavy lifting, vessel mobilisation or full quayside support, TEXO's Blyth Offshore Support Base delivers a seamless, end-to-end solution from concept to load-out.

Get in touch with TEXO today to discuss how our facilities, expertise and direct quayside access can add certainty, efficiency and value to your next project.

TEXO FOUNDATION

# GOOD LUCK TO TOMMY HODGSON!

We are incredibly proud to continue our sponsorship of professional boxer Tommy Hodgson as he prepares to step back into the ring for his first big challenge of 2026.

Tommy is set to compete on **February 28<sup>th</sup>** at the **Walker Dome in Newcastle**. Coming off a year of impressive performances, Tommy continues to embody the grit, discipline, and local pride that we value so highly here at TEXO.

With his unwavering dedication to the sport and a professional record that speaks for itself, we have no doubt he'll put on a fantastic show for the home crowd in Newcastle.

The whole team at TEXO will be behind him, and we wish Tommy the very best of luck for fight night. Let's go, Tommy!

# TEAM PLAYERS OF THE MONTH

## OFFICE BASED

### Muntaha Albaiaty

Muntaha consistently excels in all our core values at Texo, working diligently to manage cost control and invoicing requirements for various contracts. Her knowledge, dedication, and outstanding work ethic are second to none, she is a phenomenal asset to TEXO, and she fully deserves recognition for the significant contribution and effort she has shown since joining the company. She's made an amazing impact on the business and we can't thank her enough.

## IN THE FIELD

### Steve McNally

Blyth

Steven is very professional and consistently goes out of his way to help everyone, demonstrating a positive "can-do" attitude focused on solving problems rather than creating them. He works as a vital link between the office and the workshop, ensuring clear communication by regularly updating on workshop activity, staff locations, and ongoing tasks. Steven has also built strong relationship with clients, who have been delighted with his approach and have provided feedback on how impressed they are with him and how confident he makes them feel in working with TEXO.
