& REFRIGERATION SOLUTIONS**

**THE AIR-X  
AIR-CONDITIONING UNIT**

# SPECIALIST HEATING, VENTILATION, AIR CONDITIONING & REFRIGERATION SOLUTIONS

TEXO delivers expert HVAC and refrigeration services across the UK and internationally, supporting high-risk, industrial and commercial environments. From hazardous-area cooling systems to large-scale building HVAC installations, we design, manufacture, install and maintain systems that ensure operational continuity, safety and efficiency.

Our solutions are engineered for performance in demanding environments – including oil & gas, marine, renewables, industrial and commercial sectors – with full compliance to regulatory and safety standards.

Whether you require a fully integrated HVAC system, specialist refrigeration, or rapid emergency response, TEXO provides dependable, end-to-end delivery.

## Sectors

### RENEWABLES

Renewable energy facilities depend on stable environmental control to protect electrical and electronic systems. TEXO designs and installs HVAC solutions that safeguard performance across wind, solar, hydrogen and battery energy storage sites. We focus on resilience, efficiency and scalability – supporting the transition to low-carbon energy while maintaining operational uptime.

### OIL & GAS

TEXO delivers specialist HVAC and refrigeration solutions designed for the demanding conditions of upstream, midstream and oil & gas operations. From offshore platforms to onshore processing facilities, we engineer systems that maintain operational integrity, personnel safety, and asset performance in extreme and hazardous environments.

### MARINE

TEXO provides marine-grade HVAC and refrigeration systems engineered to withstand high vibration, at sea high saline environments. We support commercial vessels, offshore support vessels and port-side infrastructure. Our systems prioritise durability, corrosion resistance, and energy efficiency – without compromising crew comfort or equipment reliability.

### COMMERCIAL

TEXO delivers commercial HVAC and refrigeration systems across office buildings, retail environments, public facilities, and mixed-use developments. We combine performance engineering with energy efficiency and regulatory compliance.

### INDUSTRIAL

Industrial facilities demand consistent temperature control, ventilation, and air quality management to maintain productivity and protect equipment. TEXO delivers engineered HVAC and refrigeration systems tailored to manufacturing plants, processing facilities, and heavy industry sites.

# THE AIR-X AIR-CONDITIONING UNIT

## Precision Cooling for Extreme Environments

The AIR-X is TEXO's industry-leading 24 kW packaged air-conditioning unit, purpose-built to deliver reliable, high-performance cooling in the world's most hazardous and demanding locations. Fully certified for Zone 1 hazardous areas, for both ATEX and IECEx locations, AIR-X ensures safe operation where downtime is not an option.

### Dual Certified

ATEX & IECEx

### Powerful

24kW Total Cooling Duty

### Rugged

IP66 Ingress Protection

# Air-X

## Why Choose TEXO for HVAC & Refrigeration?

1

### Integrated Delivery

In-house engineering, fabrication and installation teams ensure full project control and accountability.

2

### Hazardous Area Expertise

Certified capability in ATEX and high-risk environments.

3

### Rapid Mobilisation

Responsive teams available for shutdown support and emergency call-outs.

4

### Energy Efficiency Focus

Optimised system performance, carbon reduction strategies and lifecycle cost control.

5

### Proven Track Record

Trusted by clients across energy, marine, industrial and commercial sectors.

# MODULAR BUILDING EXCELLENCE

## Why TEXO for Modular Schools?

### End-to-End Delivery

TEXO provides a complete turnkey service – from early concept and planning through to building handover and ongoing maintenance.

### Rapid Construction, Minimal Disruption

Off-site manufacture reduces time on site, cutting noise, traffic, and disruption to school operations.

### Permanent, High-Performance Buildings

Our modular solutions meet all Approved Documents, integrate seamlessly with existing services, and can be specifically designed to support Net Zero targets.

### Scalable & Repeatable

Standardised, precision-controlled manufacturing ensures consistent quality – whether delivering a single classroom or an entire school expansion.

### Part of the TEXO Group

Access to survey, engineering, fabrication, inspection, and recruitment divisions provides unmatched 360° support.

## CASE STUDY

# ROYAL HIGH SCHOOL, EDINBURGH

A seamless, 800m<sup>2</sup> permanent extension.

## Our Impact

### Education & Community

Created modern, flexible spaces that support diverse learning needs and directly benefit the wider school community.

### Permanent Investment

A durable, energy-efficient facility that supports the school's long-term Net Zero aspirations.

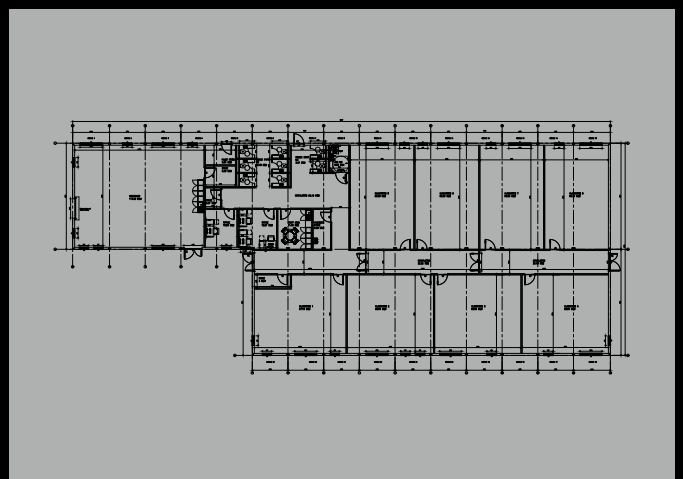

### Predictable Delivery

Enabled a reliable, predictable outcome, delivering high-quality spaces every.

## Key facilities delivered

- 8** 56-58sqm Classrooms
- 1** 113sqm CDT Workshop
- 2** Offices
- 1** Staff Area
- 1** Cleaners Store
- 2** Unisex Staff WCs
- 1** Unisex Accessible WC
- 6** Unisex WCs
- 1** Plant Room

# TEAM PLAYERS OF THE MONTH

## OFFICE BASED

### **Beckie Robertson**

Project Coordinator  
Aberdeen

Beckie consistently delivers an exceptional standard of work in her role, supporting not only our team's requests and projects but also supporting other teams too. Her attention to detail, organisation, and efficiency ensure that projects are tracked accurately from a cost perspective and delivered with minimal disruption. Her work directly contributes to the success of our team and was key to the recent successes we have had in recent months. Beckie is reliable and accountable in everything she does. Tasks are always followed through, and she ensures commitments are met without the need for escalation, and she ensures that nothing is missed. Although modest and often working in the background, her impact is significant. Beckie is a dependable and trusted member of the team, and her contributions are a key reason for our continued success. Our reputation as a company is often seen from the field through deliverables, but without the support and efforts from the office, we would not be nearly as successful. Thanks Beckie for all your efforts and doing what you do.

## IN THE FIELD

### **Harley Caddy**

Rope Access Mechanic  
Aberdeen

Professionalism exemplified, Harley has exceeded expectations during his first Rope Supervisor role during the Survey in Denmark. His ability to quickly learn and adapt has meant the entire process of work has been efficient and, above all else, safe. Harley has been a pivotal member of the rope access team during the Survey, but also able to step up and lead the team when required. His abilities to adapt between roles is the perfect example of the non-hierarchical structure, but one team, with a goal to achieve and the needs to deliver results for our clients is more important than he who takes the reigns. Harley, on multiple occasions throughout the Survey has spoken up on safety, not shy to stop the job and have a time out for safety. showcasing his prowess as a keen Level 3 rope supervisor, keeping the team safe at every opportunity.
